Metallic mesh: a dazzling security solution

Two new metallic mesh roller shutter systems impress with their aesthetics and functionality. Whether fully automatic or individually adjustable, the motorised roller shutters are a dazzling eye-catcher for bars, shops or business premises. Outside opening times they provide reliable access protection, while targeted lighting accentuates the transparent appearance of the mesh. The systems are suitable for indoor or outdoor use depending on the model.

Robust roller shutters for outdoor applications

The innovative roller shutter system for outdoor applications made of Licorne spiral mesh meets the highest security demands while incorporating an appealing, representative appearance. The spiral mesh combines robust flexibility with an unobtrusive and delicate structure, therefore allowing it to be seamlessly integrated into the architecture of high-quality facades and turning the roller shutters into an aesthetic feature of buildings. Shop windows and goods are protected from theft while at the same time granting passers-by a view of the items on display.

Mesh variant for interior applications

The roller shutter system made of a variety of stainless steel mesh types offers elegant protection indoors. With a width of up to eight metres, it protects shops, bars or counters from unwanted access. These roller shutters are also ideally suited for separating areas closed to the public in museums, hospitals or libraries. As a system supplier, GKD offers everything from design, through weaving, all the way up to delivery and installation from a single source. The motorised roller shutters can also be operated manually or individually programmed.

WORLD WIDE WEAVE

GKD – WORLD WIDE WEAVE

As a privately owned technical weaver, GKD - Gebr. Kufferath AG is the world market leader in metal, synthetic and spiral mesh solutions. Four independent business divisions bundle their expertise under one roof: Industrial Mesh (woven metal mesh and filter solutions), Process Belts (belts made of mesh and spirals), Architectural meshes (façades, safety and interior design made of metal fabrics) and Mediamesh® (Transparent media façades). With its headquarter in Germany and five other facilities in the US, South Africa, China, India and Chile – as well as its branches in France, Spain, Dubai and worldwide representatives, GKD is close to markets anywhere in the world.
